This appendix includes references to movies and movie scenes that can serve as reinforcement when it comes time to review the content of each lesson with the youth.

Regarding the *full movies*, we have identified films whose themes generally relate to the content of each section. A plot summary and a list of discussion topics are provided for each film. Upon viewing the movies, you could also have a dialogue with the youth in the form of a “film forum”/discussion, which would reinforce the formation that they receive on each theme and encourage them to develop the ability to critically evaluate the movies that they typically watch.

Regarding the individual *clips*, we have identified both movie scenes and commercials, including a description of the film (where relevant) and one or two principal ideas that can be taken from the clip. These clips can be integrated as a supplement into some of the activities to be completed with the youth.
